REMARKS

SOURCE

One twin-engine aircraft (two-seater, in-line engine, double rudder assembly, elevator assembly slightly dihedral) and one fighter (in-line engine, wings slightly dihedral, rounded off wing tips) were parked between the workshops at the RANGSDORF (N 53/2 82) airfield on 27 June 1949. Mechanics were doing maintenance work on both planes. No other aircraft were observed.

25X1A

Comment: Report shows that the RANGSDORF airfield was not occupied by an air unit. From previous information, a repair unit is assumed to be housed in the hangars. The two aircraft observed apparently were being repaired by this unit.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
